

E-GOVERNANCE POLICY

VITS e-governance uses cutting edge technology to improve the institute's governance structure. Key e-governance areas include examinations, admissions, daily departmental operations, academics, placement management, and stakeholder involvement. The objective is to strategically deploy advanced applications and solutions to ensure seamless administration.

Vision:

To be a globally recognized centre of excellence in engineering education, fostering innovation, leadership, and sustainable development.

Mission:

- To contribute to the social and economic development of this drought prone rural region through professional education.
- To provide facilities for extra-curricular and co-curricular activities
- Imparting high-quality technical and management education through the state-of-the-art resources.

Objectives:

- Implement e-governance across institution functions.
- Improve efficiency.
- Promote transparency and accountability.
- Achieve paperless administration.
- Enhance online communication.
- Provide easy access to information.
- Ensure secure data management.
- Increase global visibility.

Policy:

- Adopt e-governance extensively for simpler and efficient governance.
- Utilize e-governance for better decision-making.

Software Used: On-Edu

Areas of Implementation:

Website & Social Media: Maintain an updated website reflecting college activities.

Student Administration: Process admissions and certificates online.

Academics: Manage student progress and communicate with parents in real-time.

Internal & External Examinations: Conduct online exams with confidentiality.

Communication: Regularly update students on fees and academic matters.

Finance & Accounts: Implement suitable software for financial management.

Library: Automate library systems and provide access to e-resources.

Payments: Enable online payments.

Placements: Streamline placement processes and provide easy access to information.
