

## GREEN CAMPUS POLICY

A Green Campus embodies environmental-friendly practices and education, promoting sustainability and Eco-consciousness within the campus community. It presents an opportunity for institutions to lead in reshaping environmental culture and developing sustainable solutions to global needs.

**The college's environmental aims and objectives are:**

- Striving towards self-sustainability in power, water, and cleanliness.
- Collective contribution from faculty, staff, and students to develop an eco-friendly campus and extend the concept to the surrounding community.
- Raising awareness about environmental issues, including climate change, among students and employees.
- Implementing measures to measure and reduce environmental emissions and footprints.

**In our pursuit of improved environmental performance, we focus on the following areas:**

### **Waste Management:**

- Increasing green cover within and around the campus.
- Adopting waste segregation methods.
- Taking actions to reduce, recycle, and appropriately dispose of municipal and e-waste.
- Managing hazardous waste effectively.
- Implementing initiatives to reduce plastic consumption, promote paperless work culture, and encourage paper recycling.
- Displaying waste management instructions prominently across the campus.

### **Water Management:**

- Implementing measures to reduce water consumption, such as using greywater for flushes, rainwater harvesting, and installing water-efficient taps.
- Utilizing recycled water for landscaping purposes.
- Displaying water management instructions prominently.

### **Climate Change Mitigation:**

- Taking suitable actions to reduce greenhouse gas emissions from energy consumption.
- Installing energy-efficient lighting and equipment.

- Monitoring vehicle entry to the campus based on fuel efficiency.
- Promoting public transport usage.
- Establishing a system to track college emissions and environmental inventory.
- Organizing seminars, debates, and activities related to climate change and environmental protection.
- Incorporating environmental projects and experiments into the curriculum.
- Encouraging student involvement through initiatives like the green brigade.
- We are committed to continuous improvement in our procedures and practices, regularly reviewing policies to ensure relevance and compliance.
